#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The drawing is objected to under 37CFR1.83(a) as failing to show and label the parallelogram construction in claim 9. Correction is required. The introduction of new matter should be guarded against.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is unclear what structure comprises the arm set forth in line 11 on page 4 of the specification and how it is related to lever 12.

It is unclear what structure comprises the parallelogram construction and how wheel 16 is connected to adjust the parallelogram construction.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3652

Regarding claims 2 and 10, these claims set forth desired results but no structure to provide the result and are thus incomplete.

Regarding claim 9, the parallel construction should be correlated with the lever in claim 7 to define an operative device. Otherwise the claim is indefinite.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5 and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Reynolds.

Regarding claim 4, note 45 in Reynolds.

Claims 1, 2, 5, 6 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Delaney.

Regarding claim 11, note 12 in Delaney comprise stabilizer bars.

Claims 1, 2, 3, and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Corley.

Claims 1, 5, 7, 8, 9 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Prowinsky.
